Contents

Preface vi

1 GRAPHS AND SUBGRAPHS 1
  1.1 Graphs and Simple Graphs 1
  1.2 Graph Isomorphism 4
  1.3 The Incidence and Adjacency Matrices 7
  1.4 Subgraphs 8
  1.5 Vertex Degrees 10
  1.6 Paths and Connection 12
  1.7 Cycles 14
      Applications 15
  1.8 The Shortest Path Problem 21
  1.9 Sperner's Lemma 21

2 TREES 25
  2.1 Trees 25
  2.2 Cut Edges and Bonds 27
  2.3 Cut Vertices 31
  2.4 Cayley's Formula 32
      Applications 36
  2.5 The Connector Problem 36

3 CONNECTIVITY 42
  3.1 Connectivity 42
  3.2 Blocks 44
      Applications 47
  3.3 Construction of Reliable Communication Networks 47

4.Euler Tours and Hamilton Cycles 51
  4.1 Euler Tours 51
  4.2 Hamilton Cycles 53
      Applications 62
  4.3 The Chinese Postman Problem 65
  4.4 The Travelling Salesman Problem 65
5 MATCHINGS
5.1 Matchings .................................... 70
5.2 Matchings and Coverings in Bipartite Graphs ........ 72
5.3 Perfect Matchings .................................. 76
Applications
5.4 The Personnel Assignment Problem ............... 80
5.5 The Optimal Assignment Problem .............. 86

6 EDGE COLOURINGS
6.1 Edge Chromatic Number ............................ 91
6.2 Vizing’s Theorem .................................. 93
Applications
6.3 The Timetabling Problem ................. 96

7 INDEPENDENT SETS AND CLIQUES
7.1 Independent Sets .................................. 101
7.2 Ramsey’s Theorem .................................. 103
7.3 Turán’s Theorem .................................. 109
Applications
7.4 Schur’s Theorem .................................. 112
7.5 A Geometry Problem .................................. 113

8 VERTEX COLOURINGS
8.1 Chromatic Number .................................. 117
8.2 Brooks’ Theorem .................................. 122
8.3 Hajós’ Conjecture .................................. 123
8.4 Chromatic Polynomials ............................. 125
8.5 Girth and Chromatic Number
Applications
8.6 A Storage Problem .................................. 131

9 PLANAR GRAPHS
9.1 Plane and Planar Graphs ............................. 135
9.2 Dual Graphs .................................. 139
9.3 Euler’s Formula .................................. 143
9.4 Bridges .................................. 145
9.5 Kuratowski’s Theorem .................................. 151
9.6 The Five-Colour Theorem and the Four-Colour Conjecture 156
9.7 Nonhamiltonian Planar Graphs .................... 160
Applications
9.8 A Planarity Algorithm .................................. 163
